

GAMILY

gamilyapp.com

What is Gamily

Gamily is a friendship and dating app for gamers. We bring gamers together to meet, chat, play, date, and build real connections in a safe, inclusive community that puts the human behind the controller first.

About Us

Gamily is built by a two-person team.

Gabe (he/him) is the designer and creator of Gamily. He set out to build the app he wished existed made by gamers, for gamers focused on meaningful friendship and dating. Kevin (he/him) is the engineer behind Gamily. He turned Gabe's designs into a fully working iOS and Android app. With a background spanning opera and tech (including Meta), Kevin now works full-time on Gamily.
Independent by Design

We're committed to staying independent. We don't believe in growth at any cost we believe in building what gamers actually want.

Features

Safety First

- Face photo required as main profile photo
- Selfie verification before interacting
- Automated photo moderation
- No user-generated photos in chat (stickers & GIFs only)
- Toxicity detection in chat until conversations are trusted
- Easy reporting and blocking
- 3-strike system for bad behavior

Inclusive by Default

- Expansive gender options
- Select one or multiple genders for yourself
- Select one or multiple genders you want to match with
- Members will have the power to vote on features for the app and also suggested features in the app they want. We review these votes and build features on what users voted on most

Profiles

- Show current games and favorite titles
- Select preferred genres
- Video game library (300k+ titles via IGDB)
- Board game library (150k+ titles via BoardGameGeek)

Twitch Integration

- Connect your Twitch account
- Live Streams, Past Streams and Clips appear on your profile
- See when other gamers are live and watch in-app
-

Matching & Discovery

- Browse gamers manually
- Best Matches score based on shared games and genres
- Filter by game, board game, platform, gender, and location

Chat

- Stickers and GIFs only — no unwanted pics
- Share Gamer IDs instantly
- Group chats with up to 12 friends

Community-Driven Features

Users can submit and vote on feature ideas. If the community wants it, we'll probably build it.
